

Dogs are pack animals by nature and become distressed when separated from their pack.

By placing dogs in a kennel environment they are being deprived of their basic need to pack and socialize which can lead to loss of appetite, behavioral problems and depression which in some cases can take weeks to overcome.

Kennel Syndrome is now a well recognized issue.

By placing your dog in a **home based environment** the dog immediately bonds with their new pack and enjoys the same level of care they would have at home.

We have a wealth of experience and can offer a large garden for play, lovely woodland & beaches for walks and plenty of room with under floor heating for rest & relaxation.

We also offer day care and can visit your home for the care of other animals you may have. We have experience of horse, goats, pigs and other animal care.

Please feel free to call & discuss or arrange a visit.
